Exhibit 1 to the Complaint.

U.S. Patent No. US 9,911,164 v. Darden
Subsidiary "Olive Garden" Exemplary Infringement
Claims 1, 10.

Exhibit 1 to the Complaint.

1. Claim Chart

| Claim	Analysis
[1.P] A method, comprising: logging a customer unit into a restaurant dining system with a mobile device;	Olive Garden ("Company") performs and/or induces others to perform a method comprising: logging a customer unit into a restaurant dining system with a mobile device. This element is infringed literally, or in the alternative, under the doctrine of equivalents. For example, Company provides an Olive Garden application ("restaurant dining system") which is installed on various devices such as smartphones, and tablets ("mobile device"). Further, the application allows users ("customer unit") to sign in to the application ("logging a customer unit") and perform various functionalities such as finding nearby Olive Garden locations, viewing menus, and making reservations. Further, to the extent this element is performed at least in part by Defendant's software source code, Plaintiff shall supplement these contentions pursuant to production of such source code by the Company.

[1.1] when no table at the	Company performs and/or induces others to perform a method comprising: when no table at the restaurant is available: placing the customer unit on a waiting list for a table; and informing the customer unit via the mobile device that the table is ready for the customer unit.

Exhibit 1 to the Complaint.

| restaurant is available: placing the customer unit on a waiting list for a table; and informing the customer unit via the mobile device that the table is ready for the customer unit; | This element is infringed literally, or in the alternative, under the doctrine of equivalents.

For example, after the process of signing in, the application allows the user to reserve a table in the restaurant which further places the user on the waiting list and shows the estimated waiting time according to the availability of the table. Therefore, upon information and belief, the user receives the notification that a table at the restaurant is ready when the estimated waiting time is completed.

JOIN THE WAITLIST

• Check the current wait times for your Olive Garden
• Quickly add your name to the waitlist
• When you arrive, check in with the host
• Your table may not be ready immediately upon arrival, but your spot on the waitlist will get you seated sooner

CHECK WAIT TIMES

Further, to the extent this element is performed at least in part by Defendant's software source code, Plaintiff shall supplement these contentions pursuant to production of such source code by the Company. |

4

Exhibit 1 to the Complaint.

| [1.2] receiving and storing at least one customer data element from the customer unit in a database, wherein the at least one customer data element comprises the at least one request from the mobile device and at least one of a menu item selection or other item selection performed during at least one of pre-dining, dining and post-dining within the restaurant;	Company performs and/or induces others to perform a method of receiving and storing at least one customer data element from the customer unit in a database, wherein the at least one customer data element comprises the at least one request from the mobile device and at least one of a menu item selection or other item selection performed during at least one of pre-dining, dining and post-dining within the restaurant. This element is infringed literally, or in the alternative, under the doctrine of equivalents. For example, the application allows the user to select, and order ("at least one request from the mobile device") a food item from the restaurant menu displayed in the application installed on the smartphone. Further, the user can re-order the food item through an order history ("post-dining") in the application, therefore, upon information and belief, the application receives and stores the user-selected and ordered food items in the form of order history.

[2] The method of claim 1 wherein the customer unit is a single group of people.	Company performs and/or induces others to perform the method of claim 1, wherein the customer unit is a single group of people. This element is infringed literally, or in the alternative, under the doctrine of equivalents. For example, the application allows the user to select the number of guests ("single group of people") before reserving a table.
